

Software - MyIP

MyIP will show you your internal and external IP addresses, and will let you upload your external IP address as a textfile to a FTP server of your choice.

There's no user manual, but the program is intuitive and very easy to use. MyIP Screenshots

Main view

Download MyIP This program is released as "free of charge" (which is not the same as "free"). You may download and use the program without limitations. You may not, however, sell or alter this program in any way, shape or form without permission. Click here to start the download (320 kB). You don't need to register, but it's nice if you do. ;)

System requirements:
- .NET Framework 2.0 (NB!)

Installation

Double-click on the downloaded file, and let the wizard guide you through the installation process.

Planned features

- Aborting updating IP address on FTP server if disconnected
- Speed up updating of the remote IP address

If you are missing any features, found a bug or have some ideas, please contact me or use the forum!
